I would love to know- what is your drawing process? the Danemen are each such beautiful pieces of art! Also, you are great at giving them awesomely accurate facial expressions, do you look in a mirror to do so?

Q how do you draw these danemen all the same? do you take pictures of yourself and draw on them? and do you have any tips for some beginner artists?

Q as a fellow artist, I've been very intrigued by your art style, how do you do it? It looks a bit like rotoscope to me, but I could be entirely off the mark.. love your work Mr Daneman!

2 hours ago Report

I consider my comics to be rotoscoping.

Unfortunately, people on reddit don't like when I use this word.

They (rightly) point out that rotoscoping is an animation technique.

I know this I learned about it from animation.

I have adopted this technique to comics.

If people won't let me say rotoscope, then I say "photoscope."

Photoscoping is a DaniMation technique.
